

Eustim - Twin

portable unit (clinic unit - 4 independent output channels)

CONSTANT POWER LOW & MEDIUM FREQUENCY + HIGH VOLTAGE STIMULATION UNIT

- Two independent output channels (Eustim).
- Four independent output channels (Twin), it allows to treat two patients at the same time during the same session, with different programmes.
- Currents with CONSTANT POWER (C.E.P. system patented), which ensures uniform treatments, eliminating undesired effects on the patient (alterations in the skin pH, chemical burns, etc.)
- Powered by long-life rechargeable batteries and without memory effect.
- Simple to use, with its single function selector, it has a graphic display showing the various functions, the parameters selected by the operator and the position of the electrodes.
- 200 pre-stored programs with possibility of personalization.

Electrotherapy

Mach 1.3

MACH 1.3

- The equipment Mach 1.3 is a microprocessor controlled therapeutic ultrasound unit, with high reliability and ease to use, via a touch-screen graphical display.
- The Mach 1.3 with one output, has the possibility to work with the two frequencies used in physical therapy with ultrasound: 1MHz and 3MHz.
- The Mach 1.3 has a standard applicator 5cm² 1/3MHz.
- The Mach 1.3 generates ultrasound in continuous or pulsed mode in order to allow maximum flexibility of the treatment.

Ultrasound

Ultrasuoni

Healthwaves

COMPLETE SYSTEM FOR CLINIC USE

- **Two independent channels** in terms of emission parameters and asynchronous in operation.
- **60 stored programs** and **40 free** programs that may be changed by the user (intensity, frequency and phase time).
- Automatic recognition of the various attached applicators:
 - Cylinder for bed
 - Cylinder for limbs
 - Total body Cylinder
 - Plates
 - Portable Cylinder
 - Chair
- Programmable magnetic field intensity **up to 100 Gauss** and output frequency **from 1 to 100 Hz**.
- Positive semi-sinusoidal waveform.
- Graphic display, multi-function control with encoder, selection through a menu-submenu, making the medical device easy and intuitive to use.

Magnetic field therapy
Terapia a campi magnetici

Sleep Wellness

PORTABLE COMPLETE SYSTEM

- **Simple and intuitive**, with a single multifunction encoder command.
- **30 preset programs** for magnetic field intensity and pulse frequency according to the pathology.
- Frequency that can vary up to 50 Hz and magnetic field intensity up to a peak of 100 Gauss.
- Alphanumeric LCD, which shows the pathology being treated.
- **The new mattress pad allows prolonged therapies, also for more than 6 hours, without taking up uncomfortable positions.**
- Applicators:
 - Total body Pad
 - Portable Cylinder
 - Cylinder for limbs
 - Plates

The company

LEVEL is a brand leader worldwide for quality and innovation in the therapeutic laser market. LEVEL, that manufactures and sells the device, has been working closely for the last 20 years with research universities in order to be at the frontiers in the laser technology.

In 1993 the first power diodes laser could be manufactured and since then, quality and performances of the LEVEL lasers are unmatched in the world-wide market. LEVEL is also committed to Research and Development of new magnetic fields, ultrasoundtherapy and bio-electrostimulation devices.

All the LEVEL medical devices have been certified CEE 0426, to guarantee reliability and safety to the patient and the physiotherapist.

Triple Therapy

Triple Therapy incorporates Level 's twenty-odd years of experience in the control of energy applied to medicine. With the innovative **Triple Therapy different wavelengths can be used synergically to obtain:**

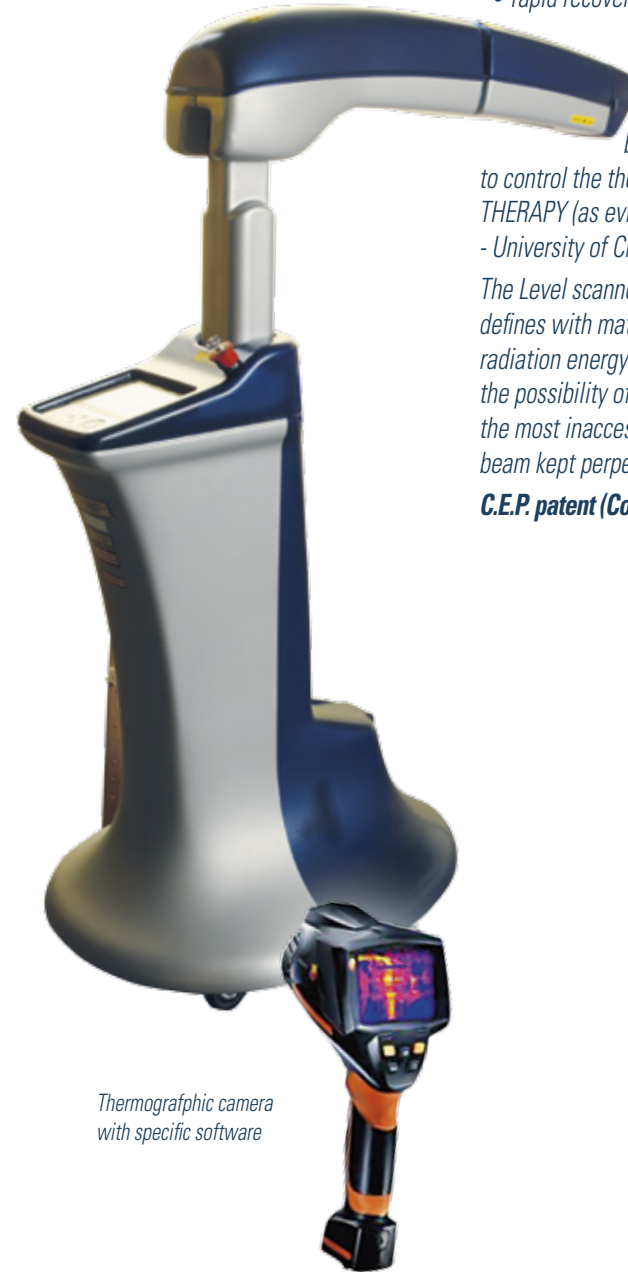

- depth of treatment
- excellent energy control
- flexible and simple use
- rapid recovery from pathologies.

A termographic camera with specific software is fitted in bundle with **Triple therapy**, helps to localized the area to be treated. After the therapy, it is possible

to control the thermal modifications, the effect of TRIPLE THERAPY (as evidenced on the studies of Saggini and others - University of Chieti).

The Level scanner system that comes with Triple Therapy defines with mathematical precision the necessary dose of radiation energy for the area to be treated and thereby avoid the possibility of error. The rotating head means that even the most inaccessible areas can be treated and the energy beam kept perpendicular to the body.

C.E.P. patent (Constant Emission Power). Professional use

Thermographic camera with specific software

Easyone 5W Easyone 6W

- **IR 970-980 nm diode** delivering power at **5000 mW CW**
- **IR 970-980 nm diode** delivering power at **6000 mW CW**
- First scanning laser of its kind with power of 970-980 nm.
- It is the only one of its kind on the market in that it allows the operator to **program emission parameters**. More particularly, the emission power may be adjusted from **1000 mW in step of 500mW to max of power**.
- 38 stored programs and possibility of personalizing the therapy by modifying all emission parameters.
- It can be used in **punctiform mode (Trigge point, reflex points, pain points)** on several points in sequence or in scanning mode.

Cryo Mag Professional

This kit can be considered at the cutting edge of Level's R&D sector, epitomising the company's efforts to finding and creating new solutions to deal with problems related to rehabilitation. Three physical energies act together and strengthen each other to offer fast, effective and safe solutions with an innovative application method.

Each applicator has been specifically designed for each part of the body to be treated and therefore offers:

- easy application
- patient comfort
- effective therapy
- the same power as our magnetotherapy equipment for consulting rooms
- maximum versatility

Cryo Mag Professional is ideal in treating traumas and injuries, post-traumatic and surgical rehabilitation protocols, chronic pathologies and all bone and joint pathologies.

Care

CARE is a modern equipment for capacitive-resistive diathermy in body treatment. Thanks to the diathermic process, the heat fluxes allow to perform several different rehabilitative therapies with important and safe results. It is a device particularly suitable for all kinds of wellness and health Centres: Outpatients Clinics, aesthetic medicine Centres, rehabilitation Units, sport trauma Centres.

Acting on a wide display, it is possible to set a personal treatment, selecting:

- treatment area
- application time
- capacitive (soft tissues) or resistive (strong tissues) treatment
- power level (adjustable, increasing from 0 up to 100%) with protective software

In total safety, both for operators and for patients, CARE maximizes the energy transmission to body tissues in terms of:

- effectiveness
- quick result
- easiness in employ
- possibility of selecting different body areas

Top LEVEL in Physiotherapy

- **Laser**
- **Magnetic field therapy**
- **Electrotherapy**
- **Ultrasoundtherapy**
- **Diathermy**

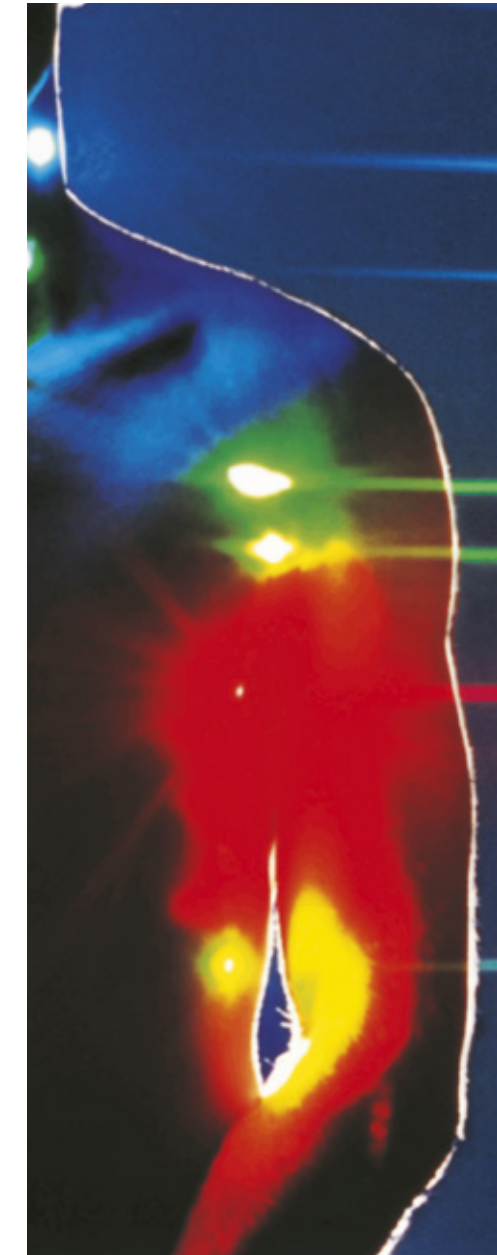

An Italian successful brand in the world. We manufacture highly technological medical devices for physical therapy. Our products maximize the therapeutic effectiveness and user-easiness. Our commitment, thanks to a close collaboration with specialists and opinion leaders, is to offer solutions in line with the progress of medicine.
