Introduction

About Us:

A Squared is a leading Hong-Kong based physiotherapy, wellness and healthcare company.

Our Mission:

Supplying our customers with the highest-quality, safety-tested physiotherapy, rehabilitation, sports fitness and medical products. To make purchasing these products easy, reliable and profitable for our clients.

History & Management:

A Squared was established in 2013 by Christof Van der Stichele. Prior to founding A Squared, Christof was international sales manager of one of the world's top physiotherapy and wellness device companies for many years.

Christof has 25 years of experience in Asian markets, international business development, building distributor networks, and supervising manufacturing.

COG-Trainer Distribution Opportunities:

COG-Trainer represents an excellent opportunity for dedicated distributors. Exclusive selling rights are still available in a number of overseas markets.

COG-TRAINER

Advanced Interactive Upper Limb Rehabilitation

AP-5828 COG-Trainer

COG-Trainer is an advanced, interactive upper limb rehabilitation concept. A complete system, which combines full range of sensor-equipped hardware with virtual reality software. After initial Range of Motion (ROM) measurement, patients are guided through individually adapted, interactive rehabilitation exercises, which simulate activities of daily living (ADL). Biofeedback programme accelerates rehabilitation speed and cognitive function. Software includes a comprehensive reporting feature for easy tracking of patient's progress.

Exerciser features

- ▶ Cognitive exercise with tools for unilateral and bilateral hands
- ▶ Effective training on Activities of Daily Living (ADL)
- ▶ Plug & play wired sensor
- ▶ Spring-type support for resistance and resilience
- ▶ Easy disinfection with washable material

Software features

- ▶ Exercise for every direction
- ▶ Evaluation of a patient's ROM and Eye-Hand coordination
- ▶ Automatic transfer of a patient's ROM to game setting
- ▶ Progress reports of multiple sessions over time
- ▶ Cognitive and Eye-Hand coordination training
